

DANISH AGRO INDUSTRY | BIOMASS BOILERS

Maskinfabrikken Faust is a manufacturer of automatic and manual biomass boilers for straw, tree trunks/logs, wood pellets and wood chips.

Faust

COMPANY PROFILE

Faust is a family-owned company with more than 40 years of experience in producing straw-fired-boilers and biofuel-boilers. The company has produced straw-fired-boilers since 1978 and is the most experienced manufacturer in this area.

Faust believes in quality rather than cheap solutions and that concept has lasted over 40 years. Through a continuous and controlled development Faust has gained a powerful position in this market and now deliver in both Denmark, Norway, Sweden, Finland and England.

PRODUCTS

Faust produces automatic and manual biomass boilers for straw, tree trunks/logs, wood pellets and wood chips. Faust also produce augers, rotary valves, spring feeders, hydraulic walking floor systems, straw rakes and handling cranes to ensure the correct operation of our boilers.

For the flue gas line Faust produces convection tubes, cyclones, multi-cyclones, filters, flue gas coolers, and steel chimneys. The company also designs and builds the essential control systems and install these on the boilers for the Security management and surveillance of the appliance

Faust has a high degree of self-production. This ensures the highest quality in all of the products and the Faust biomass boilers are some of the most advanced boilers in the field. The company's vision is to make individualized solutions that will last for many years.

The product range consists of:

- Straw-fired-boilers
- Automatic control for straw-fired-boilers
- Automatic stokers
